

Summary

Frontend Developer with hands-on experience building scalable and responsive web applications using React.js and modern JavaScript. Skilled in developing reusable components, integrating APIs, and optimizing performance to deliver efficient user experience.

Projects

Frontend Developer (Freelance / Personal Projects)

Feb 2024 — Present

Developed multiple responsive web applications using React.js, HTML, CSS, and JavaScript. Built modular and maintainable codebases with reusable components, handled API data flow efficiently, and improved load times through performance tuning and code optimization.

E-commerce Website (React)

Built a fully responsive e-commerce application with product listing, filtering, cart system, and API integration. Implemented state management for dynamic cart updates, handled user interactions smoothly, and ensured scalable structure for adding new features.

Landing Pages Collection

Created responsive landing pages using HTML, CSS, and JavaScript with a strong focus on UI/UX design. Applied modern layout techniques, improved visual hierarchy, and enhanced user engagement through clean design and smooth interactions.

Portfolio Website

Built a responsive personal portfolio website to showcase projects and technical skills. Focused on clean UI, intuitive navigation, and a user-friendly experience. Optimized performance and accessibility to ensure smooth interaction across devices.
